Pre-order site: <https://spellbox.chrd.tech>

Spellbox is a Chromosome Dynamics brand project, developed to provide first aid to large farmers, wherever they are. Representing the fusion of innovative hardware and complex software, Spellbox identifies potential problems within agricultural crops and subsequently helps to accurately detect diseases, pests and deficiencies.

By means of the 18 indices obtained with the help of satellites (multispectral analyzer), the SpellBOX software provides an overview with a very high precision of the health status of the crops and the soil. Then, in order to accurately detect possible problems in agricultural crops, the hardware device allows the introduction and real-time scanning of diseased plants, offering the user a complete report and the possibility to get in touch with one of the associated consultants in the shortest possible time . time. The information is read using a camera positioned inside the device. The complex report is displayed directly in the SpellBOX app, showing multiple treatment schemes with the respective products.

Chromosome Dynamics estimates the provision of services through Spellbox for approximately 30,000 ha for the 2022-2023 agricultural year.
